Protecting people

PSM PRO UP

U-TECH'S PSM FAMILY MOVES A LEVEL UP.

Protect your employees even better with the new U-Tech PSM Pro Up.

The new U-Tech PSM Pro Up is an intelligent alternative to the wellknown and certified U-Tech PSM Nano, U-Tech PSM Pocket and U-Tech PSM Plug In transponders.

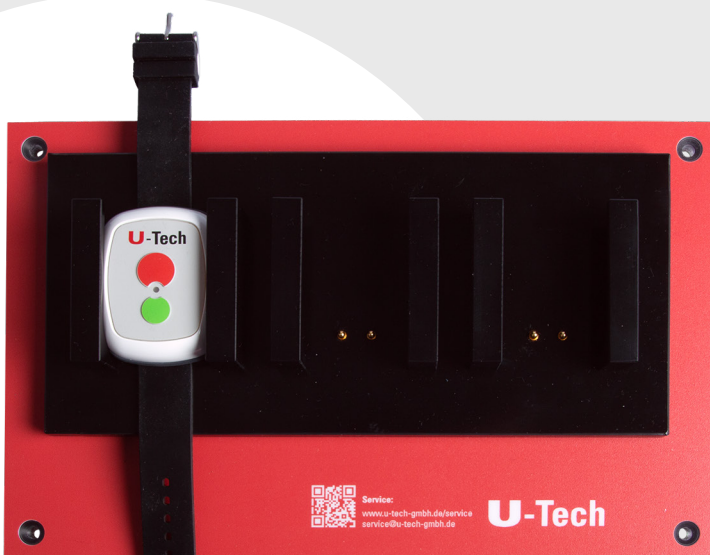

Like the little brother PSM Nano, the PSM Pro Up is worn on the wrist and is fully compatible with the rest of the family. If the protected person enters the hazardous zone of the U-Tech personal protection system, the machines are switched off immediately.

The new PSM Pro Up is recharged via gold contacts thereby eliminating the need to change batteries. Simply pull the PSM Pro Up into one of the cradles of the charger and the battery will be recharged automatically via gold contacts.

The charger provides enough space to accommodate three transponders which can be charged individually or simultaneously.

NEW!
**RECHARGEABLE
WATCH**

The PSM Pro Up is deactivated while it is in the charger. The colour of the LED on the Pro Up indicates the charge level. While loading, the LED blinks red. It changes to green when the battery is fully charged.
